# ATE Ceramic Bremsbeläge

## ATE Ceramic brake pads

### **Glanzleistung beim Bremsen**

ATE Ceramic lautet die Lösung von Continental für staubarmes, material- und umweltschonendes Bremsen. Das Geheimnis der Bremsbeläge liegt in der innovativen Bremsbelagmischung. Sie erzeugt beim Bremsen einen sogenannten Transferfilm auf der Bremsscheibe. Dieser schützt die Bremsscheibe vor übermäßigem Abrieb. Das Ergebnis: weniger Bremsstaub, mehr Komfort, weniger Verschleiß.

### **Weniger Bremsstaub, bessere Optik**

Im Vergleich zum Einsatz konventioneller Bremsbeläge müssen die Felgen wesentlich seltener gereinigt werden. Das spart nicht nur Zeit und senkt den Verbrauch teurer und umweltbelastender Felgenreiniger, sondern sorgt auch für beste Aussichten: Die Felgen erstrahlen länger in ihrem Glanz.

### **Weniger Verschleiß, geringere Kosten**

Umfangreiche Vergleichstests unter harten Alltagsbedingungen haben gezeigt, dass ATE Ceramic Bremsbeläge im Vergleich zu Standardbremsbelägen deutlich weniger verschleßen. Sie verlängern auch wesentlich die Lebensdauer der Bremsscheiben. Der geringere Abrieb senkt die Reparaturkosten und schont den Geldbeutel des Autofahrers.

### **Exceptional braking performance**

ATE Ceramic is Continental's solution for low-dust, resource-saving and environmentally friendly braking. The secret of the brake pads lies in the innovative brake pad compound. During braking it produces a transfer film on the brake disc. This protects the brake disc from excessive wear. The result: less brake dust, more braking comfort, less wear.

### **Less brake dust, better appearance**

The rims have to be cleaned much less frequently than with conventional brake pads. This doesn't just save time and lower the consumption of expensive and environmentally harmful rim cleaning agents, but also improves appearance: the rims remain shiny and clean longer.

### **Less wear, lower costs**

Extensive comparative tests under tough everyday operating conditions have shown that ATE Ceramic brake pads wear significantly less than standard brake pads. They also significantly extend the service life of the brake discs. This reduction in wear reduces repair costs and saves drivers money.

# Staubarm – Langlebig – Komfortabel

## Low dust – long-life – comfortable

### ATE Ceramic Bremsbeläge lassen Ihre Felgen besser aussehen.

Die staubarme Arbeitsweise der ATE Ceramic Bremsbeläge lässt wertvolle Felgen lange gut aussehen. Der geringe Materialverschleiß erhöht die Lebensdauer von Belag und Scheibe und verbessert außerdem den Bremskomfort. Kurzum: mehr Vorteile durch weniger Abrieb.

### ATE Ceramic brake pads help your rims look better

The ATE Ceramic brake pads' low-dust function helps valuable rims look better longer. The low wear on the material increases the lifespan of the pads and discs and additionally improves braking comfort. In short: more advantages through less wear.

#### Ursachen und Auswirkungen der Staubentstehung

Die Fahrzeugbremse wandelt Bewegungsenergie durch Reibung in Wärme um. Dabei entsteht Verschleiß. Deutlich erkennbar ist dieser an dem schwarzen Staub, der sich vor allem an den Felgen absetzt und dort unschöne Spuren hinterlässt. Das ist nicht nur ärgerlich für Autofahrer, die großen Wert auf eine gepflegte Erscheinung ihres Fahrzeugs legen, Bremsstaub belastet auch die Umwelt.

ATE Ceramic Bremsbeläge basieren auf einer neuen Materialmischung, die gegenüber herkömmlichen Mischungen fast keinen Abrieb mehr erzeugt.

#### Die Vorzüge der ATE Ceramic Belagtechnologie auf einen Blick:

- Staubarm
- Langlebig
- Komfortabel

Felgen behalten damit ihren Glanz, und die Lebensdauer der Bremsscheiben verlängert sich nachhaltig.

ATE Ceramic Bremsbeläge sind für zahlreiche Modelle unterschiedlicher Hersteller verfügbar. Weitere Informationen finden Sie auf: [www.ate-ceramic.de](http://www.ate-ceramic.de)

#### Causes and effects of dust creation

Vehicle brakes convert kinetic energy into heat through friction. This results in wear. A clear indication of this wear is the black dust which accumulates predominantly on the rims, leaving behind unsightly marks. This is not just inconvenient for vehicle owners who place high value on the appearance of their vehicle – brake dust is also harmful to the environment.

ATE Ceramic brake pads are based on a new material compound which produces almost no wear debris compared to conventional compounds.

#### The benefits of the ATE Ceramic pad technology at a glance:

- Low dust
- Long life
- Braking comfort

This ensures that rims stay shiny and the service life of the brake discs is sustainably extended.

ATE Ceramic brake pads are available for numerous vehicle models from various manufacturers. Find more information at: [www.ate-ceramic.de](http://www.ate-ceramic.de)

#### Der mobile Bremsflüssigkeitstester mit Drucker

##### ATE BFT 320P in Kürze:

Der ATE BFT 320P ermöglicht durch direktes und laborgenaues Messen der Siedetemperatur eine sichere Aussage über den Zustand der Bremsflüssigkeit. Bei diesem Vorgang wird die Bremsflüssigkeit durch Aufkochen bis zum Siedepunkt erhitzt. Die dabei ermittelte Temperatur wird in Grad Celsius angezeigt. Zusätzlich zu dieser Messung ist es ratsam, die Bremsflüssigkeit einer Sichtkontrolle zu unterziehen. Bei zu hohem Verschmutzungsgrad muss sie ebenfalls gewechselt werden.

#### The mobile brake fluid tester and printer

##### ATE BFT 320P in brief:

The ATE BFT 320P measures the boiling temperature of brake fluid directly and with laboratory precision, providing an accurate assessment of its state. In this process, the brake fluid is heated up to boiling point. The boiling point temperature that has been found is displayed in degrees Celsius. Besides measuring the temperature, you are also advised to check the brake fluid visually. If it is too dirty, it must also be changed.

# Feldübergreifende Sicherheit

## Safety across the board

### Qualität benötigt professionellen Schutz

ATE setzt auf Produktverpackungen bereits seit Jahren erfolgreich ein zweistufiges Sicherheitsetikett ein, das eine eindeutige Identifizierung von Original ATE Produkten ermöglicht.

Die erste Stufe des Sicherheitsetiketts stellt der tesa Priospot® dar. Die Holografie-Technik mit verschiedenen Prüf- und Sicherheitsmechanismen ist nicht zu fälschen und schützt somit sogar das Etikett selbst vor Nachahmern. Mit dem tesa Priospot® wurden die Merkmale des tesa Holospot® – der weiterhin im Markt verfügbar ist und nach wie vor höchste Sicherheit bietet – noch weiter entwickelt.

### Quality requires professional protection

ATE has for years been affixing a two-stage safety label on its product packaging with great success as it permits a clear identification of original ATE products.

The first stage of the safety label is the tesa Priospot®. This holographic technology with a variety of checking and security mechanisms is forgery-proof and protects even the label itself from imitations. With the tesa Priospot®, the features of the tesa Holospot® – still available on the market and still providing the highest level of security – were further enhanced.

# Produkt- und Markenschutz

## Product and trademark protection

Die zweite Stufe ist ein DataMatrix Code, genannt MAPP Code. Die vier letzten Ziffern dieses MAPP Codes werden immer auch im Holo- bzw. Priospot dargestellt – für ein Höchstmaß an Sicherheit. Der Code kann per Scanner oder durch manuelle Eingabe auf der ATE Website überprüft werden und zeigt sofort an, ob es sich bei dem Produkt um ein Originalteil handelt. Außerdem ist die Abfrage per Mobiltelefon in Verbindung mit entsprechender Software wie der ATE App möglich.

The second stage is a DataMatrix code, called the MAPP code. The last four characters of this MAPP code are always imaged in the HoloSpot/Priospot – for maximum security. The code can be checked by scanner or by manual entry at the ATE Website and indicates immediately whether the product is an original part. An inquiry can also be made by a mobile phone in conjunction with suitable software such as the ATE app.
